

## BatchMan – Automation and Monitoring of Business Processes for SAP and non-SAP

BatchMan takes over your background processes for all SAP and non-SAP systems and ensures that your business processes are moved forward efficiently, securely, and conservatively. Swift completion of processes and smooth integration with the SAP standard system make BatchMan a comfortable solution to meet all your demands.

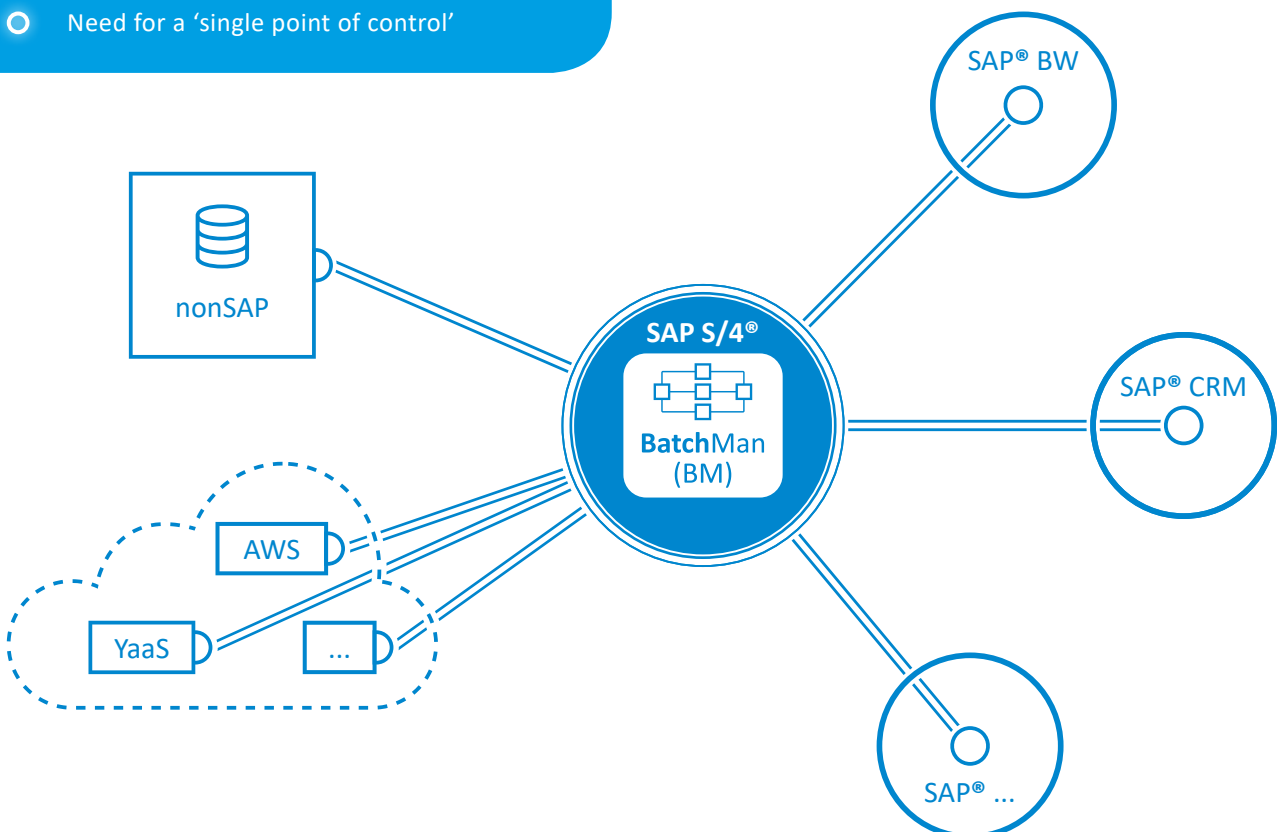

### Requirements of IT Departments

- Automation of SAP and non-SAP landscape and data applications such as SAP HANA
- Clear mapping of complex process chains
- Reduction of error warnings and manual handling
- Time and cost reduction and transparency between specialist departments and IT
- Extended job control through resource management, parallelization, event- and time control
- Need for a 'single point of control'

### The Solution:

BatchMan is the only system for process automation that runs in the ABAP stack, the core of each SAP system, and controls all SAP and non-SAP processes securely and flexibly from within SAP. In the process, BatchMan integrates itself perfectly into the existing landscape without requiring separate hardware or software.

A transparent pricing structure and low operating costs guarantee a fast Return on Investment.

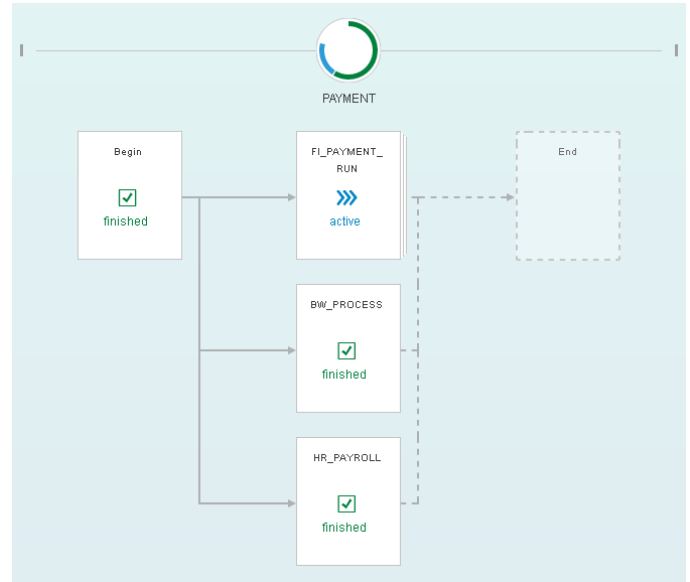

# BatchMan

## Key Benefits of BatchMan Automation:

- Full SAP ABAP integration
- Central planning, control and monitoring of automated processes (SAP / non-SAP)
- Automatic recovery functions and alarming
- File-backup & switchover functionality for maintenance and downtimes
- Completely integrated process documentation, even Solution Manager
- Change history and error acknowledgement
- Extensive reporting and mass change possibilities
- Graphic modelling and visualization of process chains
- SAP S/4HANA certified
