BatchMan

BatchMan – Automation and Monitoring of Business Processes for SAP and non-SAP
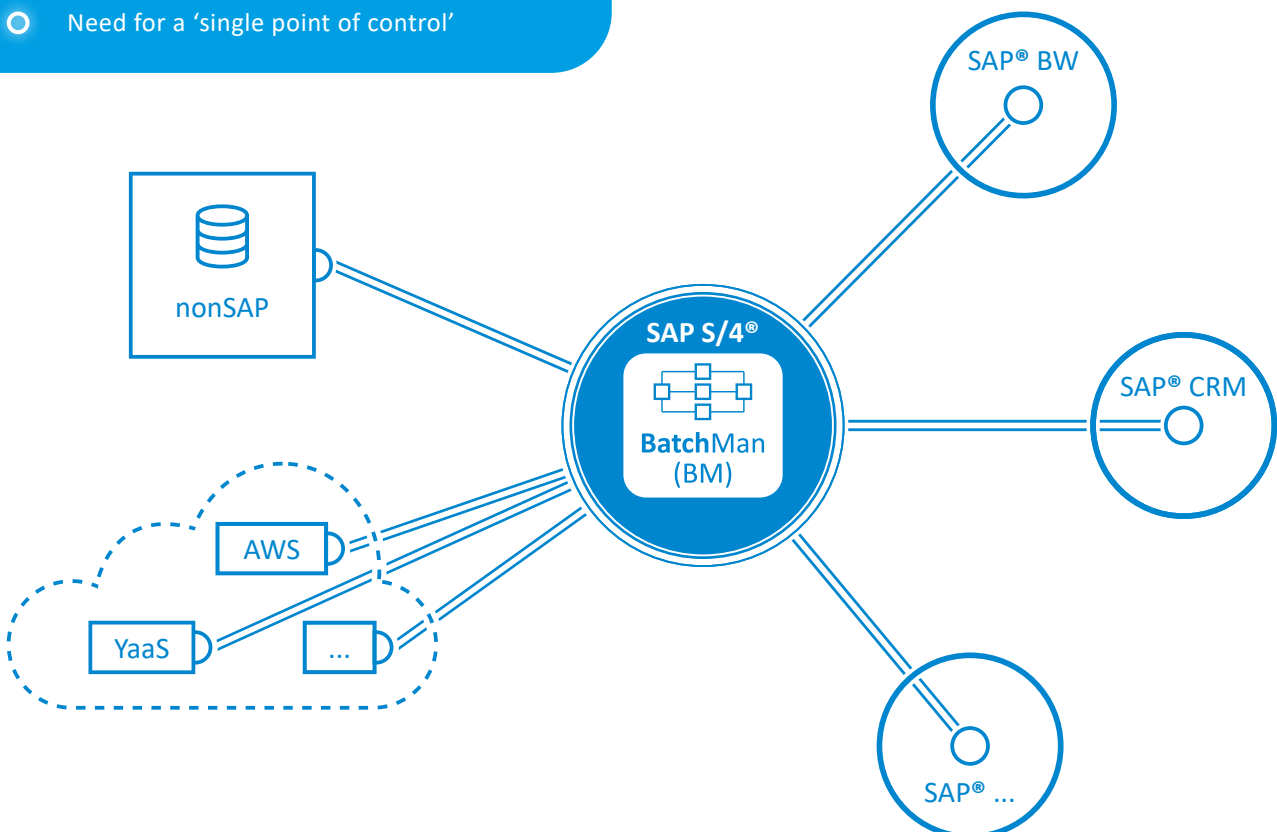

BatchMan takes over your background processes for all SAP and non-SAP systems and ensures that your business processes are moved forward efficiently, securely, and conservatively. Swift completion of processes and smooth integration with the SAP standard system make BatchMan a comfortable solution to meet all your demands.
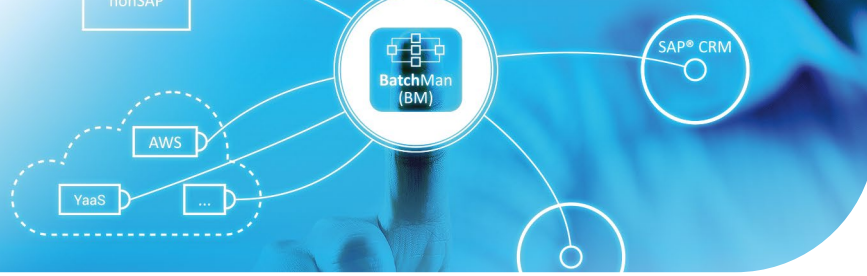

Requirements of IT Departments

○ Automation of SAP and non-SAP landscape and data applications such as SAP HANA

○ Clear mapping of complex process chains

○ Reduction of error warnings and manual handling

○ Time and cost reduction and transparency between specialist departments and IT

○ Extended job control through resource management, parallelization, event- and time control

○ Need for a 'single point of control'

The Solution:

BatchMan is the only system for process automation that runs in the ABAP stack, the core of each SAP system, and controls all SAP and non-SAP processes securely and flexibly from within SAP. In the process, BatchMan integrates itself perfectly into the existing landscape without requiring separate hardware or software.

A transparent pricing structure and low operating costs guarantee a fast Return on Investment.
