

File & DataManager

File & DataManager – Centralized File-Management Workload Automation

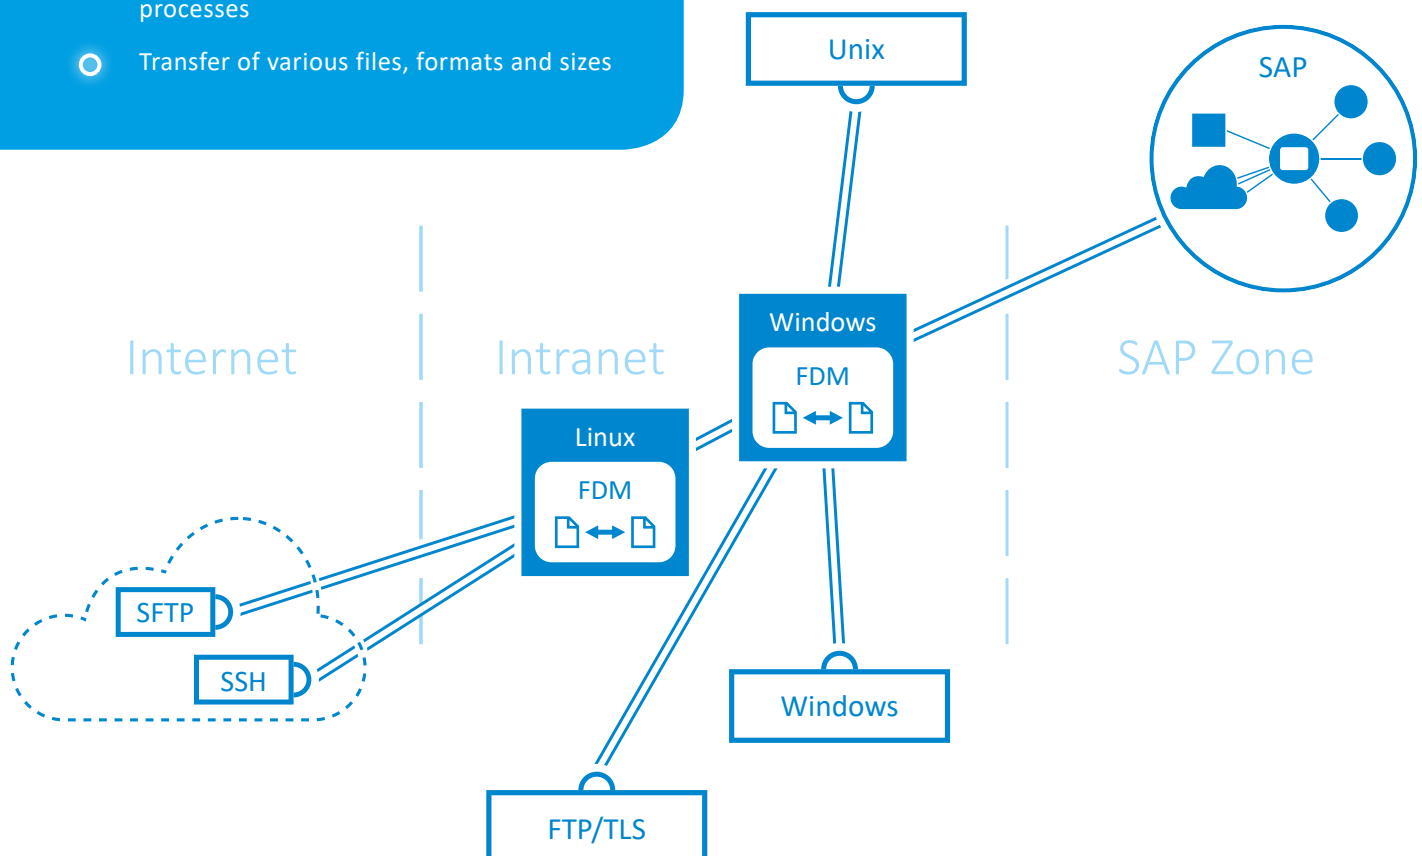

Digital transformation and the future role of ERP bear a major challenge for most companies. There is lack of consistency regarding processes, content validation and proper monitoring. Hence, there is a constant increase of demand for automated file-operation and -administration. Workload automation provides a solution to fulfill these requirements to successfully pave your way into the digital age and create space for innovation in your company.

Requirements of IT Departments

- Landscape-wide control from SAP
- File-management with non-SAP systems
- Centralized administration and control of file-management
- Reduction of error warnings and manual handling
- Transparency and traceability of the data processes
- Transfer of various files, formats and sizes

The Solution

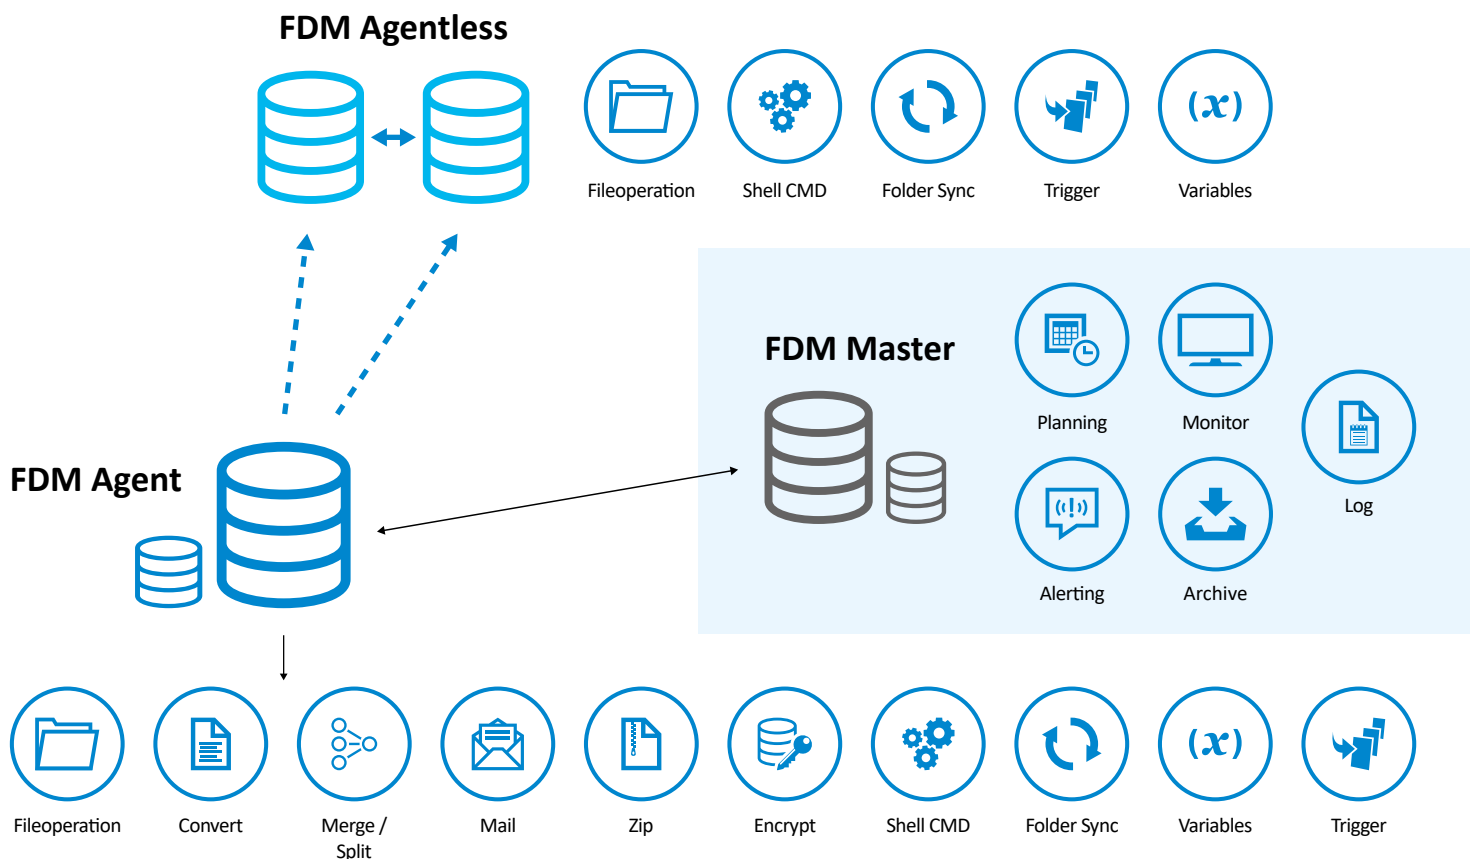

The system-wide, centralized administration of the File & DataManager allows a comfortable, as well as managed exchange of data. Its integrated monitoring visualizes every step of the file-operation to retrace all process steps at any time. Ensure transparency, traceability and long-term security with full automation by implementing the File & DataManager.

File & Data Manager

Transform your business processes now

- Full integration and monitoring of your process chains
- More transparency through the visualization and documentation of your workflow
- Elimination of scripting and economization of valuable system resources
- Controlled data exchange between SAP-, FTPS-, SFTP-, SMB-systems, fileshare etc.
- Integrated fail und switchover security, as well as scaleout options
- Scheduling of non-SAP tasks
- Segregation of authorization management
- Event- and time-based control
- Risk minimization through automated, consistent workflow
- Reduction of error rate and alerting system in case of deviations
- Single Point of Control, Single Point of Monitoring

HONICO Systems specializes in Business Workload Automation for SAP and nonSAP. Our solutions enable central, cross-system control and administration of your processes, on-premise or in the Cloud. As a SAP Build Application Development Partner, HONICO combines years of expertise in the SAP area with cutting-edge technology.
